

# Bushfire Regeneration Project

## Bushfire Regeneration Project

### Bushfires

- The bushfires in 2013 destroyed many large casuarinas trees next to the Pacific Highway.
- Post the fires, heavy rain and poor drainage further impacted trees and regrowth.

### Regeneration Project

- Drainage improvement works completed.
- First stage consist of construction of:
  - i. a secondary berm wall planted with tube stock; and
  - ii. planting of ~30 established trees.
- Second stage is to commence in May 2017 with further planting of 1500 tube stock understorey.

Planting of trees
