

SUMMER INTERNSHIP PROGRAM

Gain valuable hands on experience

Be well rewarded (\$684 - \$829 per 35 hour week)

Work with a great team

ABOUT DELTA ELECTRICITY

Delta Electricity is Australia's largest electricity generator with over 5,000 MW of installed capacity. Delta generates electricity from coal, gas, hydro and biomass.

Most of our generation occurs at five power stations located in regional NSW

- Mt Piper and Wallerawang near Lithgow
- Vales Point, Munmorah and Colongra on the NSW Central Coast.

Delta recognises that environmental impacts arise from the use of fossil fuel in power production and is focusing considerable investment into improving its sustainability. Our environmental management procedures are in line with international best practice.

We are committed to renewable and low emission energy generation, sustainable water use and keeping to a minimum the impact of our operations on the environment and on neighbouring communities.

WHAT IS A SUMMER INTERNSHIP?

An internship is an opportunity for university students currently completing their degree to gain practical skills and experience over the summer vacation period.

The experience gained through an internship helps deepen understanding of the theoretical aspects of your studies and gives you a great advantage when applying for Graduate roles in the future.

OUR SUMMER INTERNSHIP PROGRAM

Each year at Delta Electricity we have many exciting summer internships available for students from first year right through to final year in a number of disciplines. These include:

- [Civil Engineering](#)
- [Chemical Engineering](#)
- [Electrical Engineering](#)
- [Environmental Science](#)
- [Business and Finance](#)
- [Human Resources](#)
- [Mechanical Engineering](#)
- [Mechatronics](#)
- [Occupational Health & Safety](#)

Positions are available for 10 weeks over the summer vacation period. Students commence work in early December and finish by mid February to return to University.

Don't just take our word for it...

HOW TO APPLY?

Applications for summer internships at our Central Coast power stations open on Friday 12 August 2011 and close on Friday 9th September, 2011.

WHAT TO INCLUDE?

1. A copy of your resume
2. Details of your education - discipline, year of study & achievements including a copy of your most recent academic transcript.
3. A covering letter answering the following questions;
 - Why you would like a Summer Internship at Delta Electricity?
 - Information about your future career goals
 - Are you available to work from 5th December 2011 until 17th February 2012 ?

Forward your application via email to: HRcentralcoast@de.com.au with Reference 11/SUMINT in the subject line.

Need more information about Delta Electricity? Check out our Annual and Sustainability Reports at www.de.com.au

WHAT HAPPENS NEXT?

- 1) A member of our Human Resources team will send you an email to confirm we have received your application.
- 2) Once applications have closed we will review all applications and get back to you to discuss the next stage in the process.

Here's what previous interns have had to say:

- " My experience with Delta has been positive and I would recommend the internship program to others in the future"
- " It has taught me about the practical application of my degree and will be extremely beneficial throughout the rest of my studies"
- " I enjoyed the responsibility of being given technically complex tasks. My team mates were very helpful and readily gave advice"
- " I thoroughly enjoyed my time at Delta and hope to have the opportunity to work here again"
