## About Us

The Vales Point Power Station is owned and operated by Sunset Power International and trades as Delta Electricity.

Vales Point is a coal-fired power station providing a reliable supply of 24-hour baseload electricity. The electricity generator is located on the NSW Central Coast, with installed capacity of around 1,320 megawatts. Part of Vales Point's coal supply is co-fired with biomass to replace a proportion of coal with a renewable fuel.

Our generators produce around four per cent of the electricity needed by consumers in the National Electricity Market, comprising all states and territories except WA and NT.

Our Sydney office is located at:

Level 7/287 Elizabeth Street Sydney NSW 2000.
