Graduate Careers

Our Graduate Development Program has been tailored to really kick start your career!

Working with our experienced professionals you will have the opportunity to begin applying your skills and gain valuable experience from your very first day. To enhance your professional development, our program also incorporates ongoing professional development and mentoring.

Exceptional opportunities exist for accelerated career development on completion of this program.

Opportunities may be offered across a range of disciplines, including engineering, science, business, marketing, finance and IT.

What do our Graduates have to say about working at Delta.

"The best part about my experience so far with Delta is the welcoming and helpful team that I work with. They are all so willing to put in the effort to show you processes and guide you through the steps until properly understood, this environment has helped me grow so much over my time at Delta. Working with Delta challenges you and your problem-solving skills to identify and rectify areas of plant in an efficient and timely manner." **Ethan, Graduate Mechanical Engineer.**

"The best thing about being a graduate at Delta, for me, has been learning and developing new skills in Environmental Management in Power Station Operations – which was not well covered in my degree. I have been able to put the theoretical knowledge gained through university into real-life situations, all while developing an understanding of what role my team play in the business and being surrounded by amazing people." **Sophie,**

Graduate Environmental Scientist.

“The opportunity to work in the power industry and gain a wide scope of technical and professional experience.” **Jared, Graduate Electrical and Electronics Engineer.**
