Sustainability Policy

Sustainability involves balancing economic, environmental, social and corporate governance aspects of the business so as to meet the needs of today without compromising the needs of future generations.

Delta Electricity's core business is the base load generation of electricity. To meet its sustainability goals, Delta is focused on maintaining a balance between the demand from the community for a reliable and economic electricity supply, and the impact from the production of this electricity on the environment and the communities where it operates.

Delta's Sustainability Policy outlines it will meet its corporate responsibility and obligations to continually improve its sustainability performance.
