Functions and Objectives

Delta Electricity's mission is to generate electricity safely, reliably and competitively while respecting our workmates, customers, community and the environment.

PRINCIPAL FUNCTIONS

Delta Electricity's principal functions are to:

- establish, maintain and operate facilities for the generation of electricity and other forms of energy; and
- supply electricity and other forms of energy.

OUR OBJECTIVES

In carrying out these principal functions, Delta Electricity is guided by the following objectives:

1. to operate efficient, safe and reliable facilities for the generation of electricity at a competitive cost;
2. to be a successful participant in the wholesale market for electricity;
3. to contribute to the development of low carbon emission electricity;
4. to promote the use of sustainable energy practices;
5. to protect the environment by conducting our operations in compliance with NSW environment laws;
6. to contribute to regional development and decentralisation in the way in which we operate; and
7. to improve the skills and work practices of our people to promote and enhance safety, productivity, efficiency and job satisfaction.
