Apprenticeships

At Delta we challenge ourselves to seek new ways to grow energy sustainably. As the energy market and technology goes through rapid change our apprentices and trainees are an important part of Delta's future, joining a team that is multi-skilled and adaptive and firmly focused on safety in everything that we do.

At Delta we build futures, not just careers. Our diverse opportunities to develop and grow have seen our former apprentices and trainees grow into leaders within our business as well as well-respected employees within the Electricity Generation sector.

In 2021, Delta is excited to employ 11 apprentices and 9 trainees across a diverse range of specialities from Administration, Electrical and Mechanical Fitting, Advanced Rigging and Technicians.

Delta Electricity is committed to building a culturally diverse and inclusive workplace and strongly encourages applicants to apply regardless of gender, age, sexual orientation or disability. As an organisation, we champion inclusivity in the workplace

and celebrate the differences in all of our employees.

Our apprentices undertake a four year program covering all aspects of a large industrial operation, whilst combining on the job experience with formal training. Our Trainees undertake focussed training to develop and refine their skills in their chosen speciality. Delta is committed to apprentice and trainee programs that not only allow progression towards toward a formal qualification but ensure relevant training that prepares our staff for the challenges of a rapidly changing industry.
