## About Us

The Vales Point Power Station is owned and operated by Sunset Power International and trades as Delta Electricity.

Vales Point is a coal-fired power station providing a reliable supply of 24-hour baseload electricity. The electricity generator is located on the NSW Central Coast, with installed capacity of around 1,320 megawatts. Part of Vales Point's coal supply is co-fired with biomass to replace a proportion of coal with a renewable fuel.

Our generators produce around four per cent of the electricity needed by consumers in the National Electricity Market, comprising all states and territories except WA and NT.

On 15<sup>th</sup> December 2022, Seven Global Investments Pty Ltd completed the acquisition of Delta Electricity Pty Ltd and its subsidiaries including Vales Point Power Station and the Chain Valley Colliery in New South Wales.

Sev.en Global Investments is a family office investment group from the Czech Republic that deploys its own capital for the long term with the objective to build successful, growing and resilient businesses primarily in the energy, mining and adjacent sectors. Sev.en's portfolio includes power generation, coal and mineral mining assets in Australia, metallurgical coal mining assets in the United States and power generation assets in the United Kingdom.
